

UNITED STATES DEPARTMENT OF COMMERCE Patent and Trademark Office

Address: COMMISSIONER OF PATENTS AND TRADEMARKS Washington, D.C. 20231

SERIAL NUMBER FILING DATE FIRST NAMED INVENTOR ATTORNEY DOCKET NO. 3008-33751 R 12/14/90 KETCHAM 07/628,440 **EXAMINER** BUDD, M KLARQUIST, SPARKMAN, CAMPBELL, LEIGH WHINSTON ART UNIT PAPER NUMBER ONE WORLD TRADE CENTER, STE. 1600 2102 121 S. W. SALMON STREET PORTLAND, OR 97204 DATE MAILED:

This is a communication from the examiner in charge of your application.

COMMISSIONER OF PATENTS AND THADEMARKS					
This application has been examined A shortened statutory period for response to t Failure to respond within the period for response.			nis action is set to expire	cation filed on 4/13/92 month(s), become abandoned. 35 U.S.C.	days from the date of this letter.
Part I THE FOLLOWING ATTACHMENT(S) ARE PART OF THIS ACTION:					
1. 3. 5.		Notice of References Cited by Exan Notice of Art Cited by Applicant, PI Information on How to Effect Drawi	niner, PTO-892. (∂) O-1449. ng Changes, PTO-1474.	2. Notice re Patent Drawing, P 4. Notice of informal Patent Ap 6.	TO-948. pplication, Form PTO-152.
Part I		SUMMARY OF ACTION			
1.	×	Claims /- / / Of the above, claims	/-5	. a	are pending in the application.
_	_				
2	_				
3.					
4.	×	Claims 6-17			are rejected.
5.		Claims			are objected to.
6.		Claims		are subject to restric	ction or election requirement.
7.		This application has been filed with informal drawings under 37 C.F.R. 1.85 which are acceptable for examination purposes.			
	_				
٠.	_	Formal drawings are required in response to this Office action.			
9.	П	The corrected or substitute drawings have been received on Under 37 C.F.R. 1.84 these drawings are acceptable not acceptable (see explanation or Notice re Patent Drawing, PTO-948).			
10.		The proposed additional or substitue examiner. disapproved by the examiner.		has (have) bee	n 🔲 approved by the
11.		The proposed drawing correction, fi	led on, h	as been 🔲 approved. 🔲 disapp	roved (see explanation).
12.		Acknowledgment is made of the claim for priority under U.S.C. 119. The certified copy has Deen received not been received			
		Deen filed in parent application,	serial no	; filed on	
13.		Since this application appears to be in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11; 453 O.G. 213.			
14.		Other			

Serial No. 628,440

Art Unit 2102

Claims 9-17 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are vague and indefinite. Claims 9 and 15 are so alternative in the cited connections as to leave confusion as to what structure is being defined, and thus not adequately defining the metes and bounds of the claims. Also, the examining is unable to read any of claims 9-17 on any of the described or illustrated embodiments. For example, claim 13 is directed to a pi network (applicants fig. 11), but finding which is a just, second or third electrode, shared resonators, etc. is not possible. Thus the claimed structure is confusing as it does not appear to define the structure as disclosed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6-8 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Smythe, Japan, Nagata, Tokoshima (176), Pradal or Berlincourt.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section

Serial No. 628,440

Art Unit 2102

102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 9-17 (as understood) rejected under 35 U.S.C. § 103 as being unpatentable over Curran (622), Curran (276),
Berlincourt, Yamamoto. The references teach utilizing a single slab of piezoelectric material to form a monolithic circuit network. 'Pi,' 'T' and 'L' type networks using piezoelectric resonators are all known per se, and to construct any known, specific network as a monolithic structure would have been obvious to one of ordinary skill in the art as it would provide the known benefits of such monolithic construction i.e. temperature stability, easy construction, fewer parts, reduction in size, etc.

Further cited to show monolithic piezo devices are Curran (275), Takahashi, Roberts, Tokoshima (754) Yamaguchi, Masaie, Dailing, Kellen and Takano.
